

# Chameleoon™

Retractable Hose System

The vacuum system that changes with your every cleaning need.

Vacuuming should be convenient, easy and even a little fun. With the Chameleoon™ Retractable Hose System, it can be all three! Unlike other central vacuum systems, there is no bulky hose to carry around. Instead, the Chameleoon hides the hose inside the vacuum tubing.

For powerful cleaning, simply **Pull. Vacuum. Retract.**™ Each hose covers up to 2,200 square feet of living space!

Chameleoon can be used for both quick clean-ups and more thorough vacuum jobs. It's just one of the ways Chameleoon changes to meet your cleaning needs!

# Superior Retractable Hose Features & Benefits

## Adapts to Your Needs

Chameleon™ is perfect for every part of your house, even the garage! Hoses are offered with and without hose socks in lengths from 30' to 50'. Valve doors are available in several colors to complement any décor.

## Engineered for Optimum Performance

Chameleon has been carefully engineered to give you the ultimate retractable hose experience. Features like reduced friction on the hose, magnetic door closures, and automatic turn-off provide a seamless vacuum experience for you!

## Consistent Seal & Automatic Lock

Unlike other retractable hose systems, Chameleon features an automatic lock and patented dual-seal system. This ensures a consistent seal every time and more vacuum power for your messiest cleaning jobs!

## Built-in Handle

Chameleon features a built-in, 360° swivel hose handle that can be used on its own for quick clean-ups. Attach a cleaning tool for even more versatility.

## Industry's Best Warranty

The Chameleon valve is backed by an industry-leading 5 year warranty.

## How Chameleon Works

### PULL.

Pull the hose out until you hear an audible click indicating it is locked into place. Switch the system on.

### VACUUM.

Accessories are available for any cleaning job. Just choose your attachment and let the powerful suction do the work.

### RETRACT.

When done, twist the hose counterclockwise (left) to release. Cover the end with your hand and the hose puts itself away automatically! The system turns off when the handle is in place.
